The Muslim Brotherhood in America: The Overview

By allowing our attention to be focused exclusively on the danger and prevention of terrorism, we ignore the many other ways we are being attacked. This series is an introduction to 'civilization jihad', a form of warfare that employs manipulative financial techniques, lawfare, infiltration of our civil institutions and government and insidious information dominance.

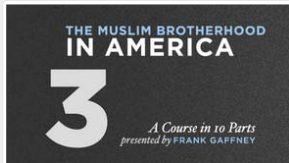

Part 1: The Threat Doctrine of Shariah & the Muslim Brotherhood

The first section of this briefing explains what shariah is according to the authorities and institutions of Islam and as promoted most aggressively by an organization called the Muslim Brotherhood.

Part 2: The Brotherhood's 'Civilization Jihad' in America

The Muslim Brotherhood's strategy for realizing its mission of "destroying Western civilization from within" was described in an undated 1991 Muslim Brotherhood document entitled "Phases of the World Underground Movement Plan." In this part, we investigate what they're doing to implement it.

Part 3: Brotherhood Influence Operations Against 'Policy Groups': Conservatives & the GOP

A closer look at one of the Ikhwan's most successful influence operations: its penetration and manipulation of the Republican Party and the conservative movement in America.

A unique and monumental project by Frank Gaffney and the Center for Security Policy, “The Muslim Brotherhood in America: A Video Course” is both an essential guide to comprehending the depth and breadth of the threat posed to America by the Muslim Brotherhood, and a useful plan of action to counter that threat.

About the Course

Have you ever asked yourself why, despite more than ten years of efforts –involving, among other things, the loss of thousands of lives in wars in Iraq and Afghanistan, well-over a trillion dollars spent, countless man-years wasted waiting in airport security lines and endless efforts to ensure that no offense is given to seemingly permanently aggrieved Muslim activists – are we no closer to victory in the so-called “war on terror” than we were on 9/11?

Thankfully, we have been able to kill some dangerous bad guys. The sad truth of the matter is that, by almost any other measure, the prospect of victory is becoming more remote by the day. And no one seems able to explain the reason.

In an effort to provide the missing answer, on April 24, the Center for Security Policy is making available via the Internet a new, free ten-part video course called "The Muslim Brotherhood in America: The Enemy Within." This course connects the proverbial dots, drawing on a wealth of publicly available data and first-hand accounts to present a picture that has, for over a decade, been obscured, denied and suppressed:

America faces in addition to the threat of violent jihad another, even more toxic danger – a stealthy and pre-violent form of warfare aimed at destroying our constitutional form of democratic government and free society. The Muslim Brotherhood is the prime-mover behind this seditious campaign, which it calls "civilization jihad."
