

Sustainable, accessible solar energy solutions for a brighter future.

WK Solar provides sustainable energy solutions for a cleaner, greener tomorrow. Our CdTe Solar Panels—with their specialized thin film design—produce high-energy output, even in low light conditions. Our next generation manufacturing process allows WK to produce highly efficient frameless panels that ensure cost effective production and installation- savings that we pass on to the customer. It's one of the many ways we are working to make solar power more accessible and affordable.
