Legend:

Data Related to Obama Presidency.

Note: Math based on gov published data.

GDP = Gross Domestic Product (U.S. Growth Rate).

CPI = Consumer Price Index (U.S. Annual Inflation Rate) (CPI Excludes food and energy prices).

RGR = Real growth rate. (GDP - CPI = RGR) - Our calculation based on gov data.

REO = Real Economic Output. Our interpretation of Real Growth Rate (RGR).

Recession calculated by netadvisor.org for years where Real Growth Rate (RGR) was negative.
