Skype Portable DLL Hijack

Skype looks for "**api-ms-win-core-winrt-string-l1-1-0.dll**" - an oddly named DLL file – under its phone directory (`\app\skype\Phone\api-ms-win-core-winrt-string-l1-1-0.dll`)

Returning FALSE from `PROCEsS_ATTACH` seems to have no negative effect. In fact, the DLL is never found on my version of Skype naturally (and looks for it in 10 different places before giving up)

Skype also has the "DWrite.dll" vulnerable load, attempting to find it under the phone directory first
